Profile

As an up-and-coming developer, my goal is to create apps that make a positive impact on people's lives and are loved by the users.

Technical skills

- JavaScript and TypeScript programming languages.
- React and the React ecosystem
- Git version control system
- HTML, CSS, and related web technologies
- Node.js and Express.js
- RESTful API design and implementation
- Debugging, testing, and troubleshooting web applications

Projects

Online Dictionary ⧉ - React app made using a Dictionary API.
Interactive Card Details ⧉ - User-friendly application designed to help users easily input their credit card information.
Password Generator ⧉ - Modern-looking TypeScript app that generates passwords.
IP Tracker ⧉ - App that finds the location of an IP address and displays it on a map.
